Order from LC or SLA mi\$1.80, ph\$1.80      60-15297

Trans. of Stal' (USSR) 1958 [v. 18] no. 4, p. 295-297.

A study of the stability of strongly magnetic modifica-  
tions of iron oxides in roasted ores has made it possi-  
ble to find types of ores for which it is advantageous to  
employ reducing-oxidizing or reducing roasting.

4256808

The vasopressor substance angiotensin II (hypertensin II) which was found in increased quantity in the organism in certain cases of hypertension can now be prepared synthetically. So far there are no accurate laboratory methods for its quantitative detection in patients' blood. A method to regain angiotensin from the blood in a good yield was developed. The way described con-  
(Biological Sciences--Pharmacology, TT v. 9, no. 9)
